

Safety & Workwear Products

The SCAN brand offers a comprehensive range of Safety and Workwear products designed to meet the needs of both DIY and Trade Users.

▶ head & hearing

Head protectors are essential for site workers and the safety requirements of workers needing protection from falling objects or striking against fixed objects.

▶ eyes & face

A range of spectacles, goggles and face shields providing a level of protection over a wide span of applications and hazards.

▶ respiratory

Respiratory protection is essential when working in an atmosphere contaminated by dust, vapours, fumes or gases. Many health and safety regulations place statutory demands on employers to ensure that the necessary level of protection is provided and used.

▶ hands & knees

A range of products for protecting the hands and knees with emphasis on the needs of workers in commercial industries where the combination of good protection and user comfort are main requirements.

▶ hi-vis & workwear clothing

High visibility garments maximise awareness of the wearer's presence even when the wearer is unaware of the proximity of others. The wearing of such garments on or near a working site is not only recommended, but is compulsory in many cases.

▶ footwear & fall arrest

A range of sturdy footwear manufactured with building, transport and construction workers in mind. User comfort combined with safety features are the two main criteria for this range. Plus the most commonly used safety harnesses for working at heights.

▶ signs & medical

A range of rigid and self adhesive signs suitable for both internal and external applications. Three 'briefcase' style first aid kits suitable for travel, leisure and general domestic use and from one up to 50 employees and one eye wash station.
