

# Personal Protection Equipment

The largest part of this range is dedicated to the area of Personal Protection Equipment and is designed to provide solutions for protection to ears, eyes, face, hands and head.

Almost on a daily basis legislation is increasing, relevant to the protection of the individual, within the working environment.

In order to meet these demands all SCAN products are tested to ensure that they comply with British, European or International specifications and all comply with current legislation as applicable.

If a product is not listed within this catalogue, it does not mean that we do not have access to it. Any bespoke requests should be passed back to us and we will be pleased to assist.
