

Disposable Masks

Unlike other bodily injuries respiratory injuries are not readily apparent in the workplace. In some cases it may not be until after workers retire that symptoms occur. It is therefore important that all staff that are, or may be at risk have access to Respiratory Protective Equipment.

Understanding the protection levels of our masks will ensure you have the correct product for your working environment.

DUST VAPOUR

MIST FUMES

Each product will have 1 of 3 protection levels

FFP1

Low toxicity
