

Lockout Tagout : Gate Valve Lockout

A simple solution for isolating gate valves, these lockouts slip over the top of the handle once the valve is in the appropriate position, rotating freely around the valve stem and thus preventing access to the valve.

The different sizes cover most commonly used valve diameters. If a gate valve lockout cannot be used due to fitting or other restraints, consider using a cable lockout system to isolate the valve.

When fitted the valve handwheel is completely encapsulated within the lockout, which will rotate freely around the valve preventing operation.

- Resistant to cracking & abrasion
- 3 padlock holes
- Di-electric properties
- Rotate freely around valve covers
- Resistant to extreme temperatures
- Suitable for hasps and padlocks
- Available in 5 sizes

Gate Valve Lockout

These gate valves are comprised of 2 flattened half moons with a hollow centre. Hinged at one side, they are placed over the valve and then closed, leaving the valve inside the lockout.

This can then be locked off using up to 3 padlocks directly, or more if used in conjunction with a hasp.

Adjustable Gate Valve Lockout

Working in a similar way to standard gate valve lockouts, adjustable lockouts are comprised of 2 separate pieces which whilst in place over the valve are slid into each other to enclose the handle.

This design allows it to fit valve handwheels from 25.5mm through to 165mm diameter.

Rotary Gate Valve Lockout

Size	Code
25 - 63.5mm	LOK001
63.5 - 127mm	LOK002
127 - 165mm	LOK003
165 - 254mm	LOK004
254 - 355mm	LOK005

Adjustable Gate Valve Lockout

Size	Code
25.5 - 165mm	LOK006

Dimensions				
Size	Inside dia. (A)	Inside depth. (B)	Outside dia. (C)	Outside depth (D)
25 - 63.5mm	70mm	32mm	76mm	38mm
63.5 - 127mm	130mm	34mm	140mm	44mm
127 - 165mm	170mm	41mm	177mm	50mm
165 - 254mm	257mm	50mm	267mm	63mm
254 - 355mm	355mm	63mm	368mm	74mm
