

Universal Circuit Breakers : Lockout Tagout

Universal Circuit Breakers

This universal MCB lockout has been designed to fit on almost any size of MCB, regardless of size or the position of the holes on the breaker.

Simply turn off the breaker and place the lockout over the switch. Use the thumbscrew to tighten the internal grub screw onto the switch, locking the unit into place.

The thumbscrew will then fold down on its integral hinge, allowing a padlock to be fitted onto the lockout preventing the thumbscrew and the unit from being removed.

3 Phase Circuit Breakers Lockout

Designed for 3 phase breakers, this large lockout fits over the switch and then the screw is tightened using the clock style section. When tight the clock section is locked to the main body through a sliding section fitted to the main body.

Will accept 3 separate padlocks with a shackle diameter up to 8mm.
