

# Photoluminescent : Signs

In the event of a fire or emergency, the visibility of standard emergency signs can often be impaired by poor lighting, smoke or even lack of power. In these cases our photoluminescent signs can provide a cost effective solution.

- High intensity flexible vinyl or 1.3mm rigid material options
- P.S.P.A class B material - brighter compared to the standard class A product usually used in safety signs
- Tested to DIN 67510 part 1 - 4 for after glow performance which exceeds international standard for flammability, smoke and toxicity
- Once fully charged will glow for 10 + hours
- Visible even in complete darkness
- UV resistant - enabling use for internal and external
- Factory applied self adhesive backing

## Fire Exit & Evacuation
