

Wraparound Spectacles

These sports-style curved safety spectacles provide protection against low energy, high speed impacts. They are UV resistant - thus acting as sunglasses - and have impact and scratch resistant polycarbonate lenses.

The lightweight nylon frame has a soft, flexible nosepiece supporting a one-piece curved lens, which maximises peripheral vision. The side-arms are fully adjustable both in length and angle to ensure a comfortable custom fit.

- One piece lens to maximise peripheral vision
- Impact and scratch resistant, polycarbonate lens with UV protection
- Side arms are extendable and tiltable for a custom fit
- Soft flexible comfort nose bridge
- Lightweight nylon frame

will withstand low energy high speed impacts up to 45m/s (100mph)

COLOURED LENSES . . . filter light for specific applications and enhance different aspects from indoor low light to outdoor high contrast purposes.
. . . choose the right one for the job!

AMBER	Indoor low light applications, enhancing contrast.
SMOKE	Outdoor applications. Protection from excessive glare.
CLEAR	For general purpose indoor applications.
MIRROR	Reduces glare, commonly used in outdoor applications.
BLUE	For indoors where there is excessive yellow or sodium vapour light. Offers a high level of contrast.
