# Mask Product Selector

This table is a quick selector guide to help you select the correct SCAN dispoasable mask or respirator for a selection of hazards that may be encountered in the occupational area. It should not be used as the only means of selecting a respirator and it does not relieve the employer/user of their duties as described by COSHH and other Health & Safety Executive Regulations. It does not in any way override any recommendations made in the required appropriate COSHH/Risk assessment.

**NB. For any application involving the removing or disposal of ASBESTOS, PLEASE CONTACT THE SCAN HELPLINE: 0845 673 3331**

### Respirator Filter Type

**A - Organic vapours & gases**
**1 = Low capacity**

**P = Dust filter**
