

# Symbols and Colours

Health and Safety signs can be broken down into the following categories, as specified by British Standards.

Our products are under continual development and/or are determined by legislation requirements

## Mandatory Signs

**Colour: White & Blue**

A blue circle containing a white image denoting that a specific course of action **must** be taken.

## Prohibition Signs

**Colour: Black, Red & White**

A red circular band crossed with a diagonal bar on a white background. A black symbol behind this band indicates the prohibited action.

## Hazard Signs

**Colour: Black, Yellow & White**

A yellow triangle with a black border and symbol denoting a hazard in the environment.

## Safe Condition Signs

**Colour: White & Green**

A green rectangle or square with a symbol/text in white providing information about safe conditions.

## Fire Equipment Signs

**Colour: White & Red**

A red rectangle or square with a symbol/text in white providing information about the location and use of fire fighting equipment.

We reserve the right to modify signs as we deem necessary. Product sizes, materials and colours are subject to standard commercial tolerances and are shown in nominal form.

Where possible, all signs are made to the latest symbols detailed in **BS ISO EN 7010**.

In cases where an ISO symbol has not been specified then the sign will be manufactured to BS 5499 standards until one has been published, at which point the stock will be updated and supplied in lieu of the design shown in the catalogue.
